Over the years, I have learned a lot about how to work with people and how to give back to those people who help me to keep the business of media production moving. The team at RPS is made up of some of the kindest, nicest, most professional and talented individuals I have had the pleasure of working with. Between doing a day's work and spending time with my friends and family, I am constantly reminded of what RPS is, and what they are about. There isn't much I can add to the awesome nature of the people at RPS. Everyone's attitude towards working with me is very, very positive. Everyone I have worked with here is always doing their best to make things happen, even if the odds are stacked against them. Their attitude is infectious. Even though I like to keep it very personal, I do want to share a story about one of the things that have stuck with me about working with RPS.
