On January 11, 2016, Autodesk announced a new version of AutoCAD: AutoCAD 2016. The new release features modern UI, a more powerful geometry engine, the ability to seamlessly collaborate with other AutoCAD users, the ability to create, print and publish 2D and 3D documents, and cloud-based capabilities. The update also introduces new geometry and

dimension tools, new editing and styling controls, new 2D and 3D coordinate systems, a new intuitive scale control and a wide range of other improvements. AutoCAD's function and value proposition are as follows: - AutoCAD is a leading, industry-standard CAD program used for all types of design and drafting tasks. - AutoCAD is available as a desktop app for PCs, as a web app for Windows, Mac OS and

mobile devices, and as a mobile app for iOS and Android devices. - AutoCAD is the first, and still the only, CAD program designed for both 2D and 3D design and drafting. - AutoCAD is available as part of a wide range of design and drafting solutions from Autodesk that help users get their ideas from concept to completion, from 2D to 3D. - AutoCAD is fully integrated with AutoCAD LT. AutoCAD LT is designed

for 2D drafting and design and the purpose of the AutoCAD LT program is to complement and augment the capabilities of AutoCAD. - AutoCAD's powerful geometry engine makes it easy to calculate the 3D properties of complex shapes. The ability to calculate complex dimensional properties including areas, volumes, etc., makes AutoCAD ideal for anyone doing architecture, civil engineering, mechanical

engineering, electrical engineering, landscape architecture, mining, construction, and other design-related tasks. - AutoCAD's object-oriented design and tools make it easy to add functionality to standard objects and model complex design ideas into elegant, self-explanatory drawings. - AutoCAD is available as a fully integrated solution. Autodesk offers a complete suite of tools and solutions that enable users to create,

design, document and share in the context of the entire AutoCAD solution. AutoCAD history The idea behind the first AutoCAD version was to create a CAD program that would be easier to use, more feature-rich, and more powerful than previous CAD programs. AutoCAD's architectural

reperfusion injury (IRI) is
the most common

pathophysiological event that occurs in various clinical situations such as, but not limited to, pelvic and abdominal surgery, trauma, shock, organ transplantation, cardiopulmonary bypass, and neonatal birth. It is characterized by a complex sequence of events including inflammation, excessive oxidative stress, and apoptosis, with an ensuing immune response. Understanding of the pathogenesis of IRI-related

dysfunction in several organ systems has provided the basis for the development of novel therapies to treat patients with IRI. In the present study, we review the current understanding of the pathophysiological events that occur after IRI in the intestine and discuss the therapeutic strategies that have been suggested to ameliorate IRI in the intestine. We aim to present current strategies to prevent and treat IRI-

LinuxQ: Make mongoose findByIdAndUpdate findBy and update all matching documents I'm using mongoose and the node-native driver to save a few documents to a MongoDB server. I currently have: `return await db.findByIdAndUpdate(userid, { $set: { firstname: firstname, lastname: lastname } }, { upsert: true },);` What I want is to be able to find and update all matching documents and not just the first one. Thanks for your

help. A: You can use the `$setOnInsert` or `$setOnUpdate` operators with `update()` to provide a condition on which to run the update or insert logic

```
db.collection.update( {  
  "firstname": { "$exists":  
    true } }, { "$setOnInsert":  
  { "firstname": firstname }  
}, { "upsert": true } ); or  
db.collection.update( {  
  "firstname": { "$exists":  
    true } }, { "$setOnInsert":  
  { "firstname": firstname }  
}, { "upsert": true } ); or  
db.collection.update( {
```

```
"firstname": { "$exists": true } }, { "$setOnInsert": { "firstname": firstname } }, { "upsert": true, "multi": true } );
```
